MONTECRISTO AUTOMATIC CHRONO

The Montecristo collection takes its name from the famous island in the Tuscan Archipelago: a mysterious, uninhabited island, surrounded by a clear blue sea

The new Montecristo 516 Automatic Chronograph features a mechanical movement designed by S.I.O., the Italian Watchmaking School within the LOCMAN Group, in collaboration with DEPA Swiss, a company run by Swiss artisans.

The three-counter movement with a date display, embellished with a customized oscillating weight, is visible thanks to a crystal positioned on the case back. LOCMAN's three-year guarantee reflects its reliability.

The case, made of AISI 316L steel – a steel used in surgery – is water-resistant tested up to 100 metres and is closed by a case back made of satin titanium, a material that is 40% lighter than steel. The custom sapphire treatment makes Montecristo's mineral glass even more scratch-resistant.

The watch's materials that come into contact with the skin, from the titanium case-back to the silicone strap, are all hypoallergenic. One of LOCMAN's design priorities is absolute attention to the quality of the materials used, both in terms of their technical features and impact on the body.

LOCMAN uses a silicone blend for the straps that is much stronger than rubber and is known for its special resistance to temperature changes and UV rays. The side openings on Montecristo's silicone straps allow easy perspiration and drying during sports use.

The ability to choose between a leather or silicone strap or a bracelet makes Montecristo suitable for any occasion, from sports events to formal occasions.
